## ■ Cyclic Variations in Altitude Conditioning™ from CVAC Systems

[www.cvacsystems.com](http://www.cvacsystems.com)

- The Cyclic Variations in Altitude Conditioning™ (CVAC™) process is an unparalleled safe and natural effort-free physical conditioning™. The company says that by spending 20 minutes in its CVAC pod two or three times a week, customers can improve athletic fitness and general wellness.
- *Stats: Dialysis patients that live at higher altitudes live longer; Less cases of obesity at higher altitudes*
- Scientifically validated, the CVAC process applies precisely composed rhythm-based changes to pressure, temperature and density of air.
- *Ultimately CVAC provides athletic people with a Lance Armstrong-type edge or couch potatoes exercise without the exercise.*
